Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1918 Excerpt: .operation per day 300 days pei year (many heaters run 24 hours per day, 365 days per year); this amounts to 105,000,000,000 lb. of coal per year, or 50,000,000 tons, worth at $3.00 per ton, $150,000,000. The saving due to the use of Cochrane Heaters is 1 to each 11 F. rise in temperature. On the average, the water is raised from 100 F. to 210 F. using steam at atmospheric pressure, giving a saving of 10 . Cochrane Heaters are thus saving about $15,000,000 per year, which is vastly more than the heaters cost. In addition, Cochrane Oil Separators are saving millions of tons of coal by purifying exhaust steam so that it can take the place of live steam in heating and drying coils, low-pressure turbines and industrial processes. Sorge-Cochrane Hot Process Water Softeners are saving millions by keeping scale and corrosive substances out of boilers and thus saving expense and labor in cleaning boilers, and expense for new tubes and other boiler repairs. Cochrane Metering Heaters are also telling hundreds of steam-plant owners, managers and operators how much they are gaining in economy by using different coals, different methods of firing and different methods of controlling the draft by stopping up air leaks in boiler settings, cleaning soot and scale from heating surfaces, etc. The total gains realized in this manner often amount to 25 or more. Our engineering department has given hard Btudy to fuel economy for over 35 years. It will...
