Magasin Pittoresque (32)

By Myung W Lee Geological Survey U.S.

RareBooksClub. Paperback. Book Condition: New. Paperback. 40 pages. OCLC Number: 51875181 Excerpt: . . . 4 Velocity Ratio and its Application to Predicting Velocities the trend of dry rock as BGT predicts. For unconsolidated M odeling the Velocity Ratio sediments with porosities greater than 40 percent, BGTL with n 1 agrees well with the measured values. For porosities In order to model the velocity ratio with respect to the less than 40 percent, BGTL with n and n 1 performs differential pressure and porosity, Biot coef cients shown in equally well. The scattering of velocity ratios shown in gure 2 Appendix A are used with the parameters shown in table is partly due to the clay content of the samples. Figure 3 shows 1. Appendix A shows two examples in which the Biot coef-the measured velocity ratios using Hans data (Han and others, cient depends on differential pressure and presents general 1986) at the differential pressure of 30 MPa with respect to Biot coef cients applicable to consolidated and unconsolidated porosity and clay volume content. Predicted velocity ratios sediments. The modeled velocity ratios are shown in gure 1 from BGT and BGTL are also shown in gure 3....

Reviews

This ebook can be worthy of a read, and much better than other. I have read and i am certain that i am going to planning to go through again once again in the future. You may like just how the writer compose this book.

-- ***Mr. Grant Stanton PhD***

A whole new eBook with an all new standpoint. It is actually rally fascinating throgh reading through time period. You wont truly feel monotony at anytime of your own time (that's what catalogues are for relating to when you request me).
