AuthorHouse. Hardcover. Book Condition: New. Hardcover. 144 pages. Dimensions: 9.1in. x 6.1in. x 0.8in.Having the opportunity to teach math for over 25 years, I have found many days when you hit a brick wall. Whether it was in middle school, junior or senior high school, or at the community college, there were days when the new topic was not understood by the students. I could see it in their reaction (faces) to my explanation. Sometimes, I was the culprit. Knowing full well that the homework is a review of that days topic, it must be delayed. That luxury is not available. FRUSTRATIONS TEACHING MATH, gives the student an opportunity to see how basic math ideas are solved. Sometimes, I give two scenarios in solving a problem. Other times, a cheating way is shown, so that math can be understood and also be fun. Some of the topics covered are the various ways to factor a binomial, trinomial, or polynomial. Another favorite is grasping the concept of greatest common factor or least common multiple. Right triangle trigonometry for the middle school student is explained using boating as the source of frustration. How much to tip at a restaurant What does a half-off sale really mean Let us not forget the story or word problems that really cause concerns. Distance! Rate! Time! All these ideas plus games and many more mathematical topics are reviewed on my 45 day road trip from Delaware to Florida. Coming back, with several stops on the way home, well explore these frustrations. This item ships from multiple locations. Your book may arrive from Roseburg,OR,...
