Reviews

This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be play, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.
(Rene Olson)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 40 pages. Original publisher: Washington, DC : Western Energy and Land Use Team : National Coastal Ecosystems Team, Division of Biological Services, Research and Development, Fish and Wildlife Service, U. S. Dept. of the Interior, 1984 OCLC Number: (OCoLC)310403880 Subject: Muskrat -- United States. Excerpt: . . . Reproduction The reproductive habitat requirements of the muskrat are assumed to be identical with its water, food, and cover requirements as described above. Interspersion The area occupied by muskrats may be influenced by a variety of factors that include environmental conditions, the size, configuraUon and diversity of the aquatic habitat, social pressures, and season (Perry 1982). Neal (1968) believed that habitat quality was more important in determining muskrat dens ity than were i ntraspecifi c interactions. Muskrat home ranges in Iowa were consistently larger in aquatic habitats with less dense vegetation than they were in habitats with dense emergent vegetation. Danell (1978) reported that the mean distance between muskrat lodges was 110 m (360. 8 ft) and no houses were closer together than approximately 40 m (131. 2 ft). Most summer ft) and fall home ranges of muskrats in Iowa were 45. 7 to 60. 9 m (150 to 200 in diameter (Neal 1968). More than 50 of muskrat observations in Manitoba were recorded within 15 m (49. 2 ft) of the primary dwelling lodge (MacArthur 1978). Few movements of muskrats exceeded 150 m (492 ft) whereas almost all foraging took place within 5 to 10 m (16. 4 to 32. 8 ft) of the lodge. Most muskrats recorded in a New Brunswick study remained in the same...
