# Active Multispectral Band Selection and Reflectance Measurement System

Filesize: 8.84 MB

### *Reviews*

*It is an incredible ebook that we actually have ever study. This is certainly for all those who statte that there had not been a worthy of looking at. I am just pleased to inform you that this is the very best publication i have got go through during my individual daily life and can be he best ebook for possibly.*

# ACTIVE MULTISPECTRAL BAND SELECTION AND REFLECTANCE MEASUREMENT SYSTEM

DOWNLOAD

Bibliioscholar Nov 2012, 2012. Taschenbuch. Book Condition: Neu. 246x189x5 mm. This item is printed on demand - Print on Demand Neuware - Due to system design requirements, an active multispectral laser radar system may be limited in the number of spectral bands that can be integrated into the system. To aid in the selection of these bands, a novel multispectral band selection technique is presented based on the cross-correlation of the material class reectance spectra over a wavelength range of 1_m { 5_m. The algorithm uses directional hemispherical reectance data from the Nonconventional Exploitation Factors database to select a number of spectral bands for classication purposes. Because the target material spectral reectance is so important to the performance of an active multispectral system, an experimental monostatic bidirectional reectance distribution function (BRDF) measurement system is developed and tested. A 1.06_m Nd:YAG diode pumped laser is frequency shifted to 1.58_m { 1.80_m using a periodically poled lithium niobate nonlinear crystal. 90 pp. Englisch.
