Urban Food Insecurity: Extent of Food Deprivation

Filesize: 2.33 MB

Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.

VDM Verlag Jul 2011, 2011. Taschenbuch. Book Condition: Neu. 220x150x7 mm. This item is printed on demand - Print on Demand Neuware - The study was conducted at one of the most deprived regions of Addis Ababa. It had objectives of finding out the determinants, extents and household coping strategies of food insecure residents in the locality. The analysis of primary data showed that 70.1% of the sampled populations are food insecure. The most common determinants of household food insecurity were found to be gender of the household head, family size, low average monthly income and very high urban food prices. Personal interviews with residents revealed that there exists a very serious problem that needs urgent response from city/country planners. Coping strategies were another concern analyzed in the study. It was found that most food insecure households have reduced their meal only to twice or once a day. Limiting the size of food per meal and consuming less preferred food types were other commonly adopted strategy to cope with food insecurity. Impacts of food insecurity were also studied and it was found that the major impact was extreme hunger sensation. Other impacts were emotional distress, physical weight loss, anxiety, continuous health complications, and educational and work performance fluctuations. 112 pp. Englisch.
