Requires EPA to conduct basic and applied research di-rected toward the advancement and dissemination of computational techniques and software tools with an emphasis on modeling to: Develop robust decision-support tools; Predict pollutant transport and their effects on humans and on ecosystems; Better understand atmospheric dynamics and chemistry. OMMITTEE IEWS VII. C V Interagency planning and coordination The High-Performance Computing Act of 1991 codified an inter-agency planning process that remains in place today. However, the chief product of this process in recent years has been an annual retrospective review of activities undertaken by agencies, rather than a prospective planning document. Furthermore, the agencies, led by OSTP, should develop and periodically refine a research, development, and de-ployment roadmap for high-performance computing systems. In ad-dition, in formulating plans for the Program, the Committee ex-pects the participating agencies to take into consideration the find-ings and recommendations of the Presidents Information Tech-nology Advisory Committee, which is required to conduct recurring reviews of the planning, implementation, and contents of the Pro-gram.
