An Introduction to Using GIS in Marine Biolog: Supplementary Workbook Three: Integrating GIS and Species Distribution Modelling

Filesize: 7.83 MB

Reviews

Completely among the finest ebook We have at any time read through. it was actually writtern really properly and helpful. You are going to like just how the writer compose this publication.
(Mr. Deangelo Considine)

AN INTRODUCTION TO USING GIS IN MARINE BIOLOG: SUPPLEMENTARY WORKBOOK THREE: INTEGRATING GIS AND SPECIES DISTRIBUTION MODELLING

DOWNLOAD PDF

To get **An Introduction to Using GIS in Marine Biolog: Supplementary Workbook Three: Integrating GIS and Species Distribution Modelling** eBook, make sure you access the hyperlink below and download the document or gain access to other information which are have conjunction with AN INTRODUCTION TO USING GIS IN MARINE BIOLOG: SUPPLEMENTARY WORKBOOK THREE: INTEGRATING GIS AND SPECIES DISTRIBUTION MODELLING ebook.

Pictish Beast Publications, United Kingdom, 2014. Paperback. Book Condition: New. 254 x 203 mm. Language: English . Brand New Book ***** Print on Demand *****.This book is the third companion volume to An Introduction To Using GIS In Marine Biology . It is designed to augment the information on using GIS in marine biology provided in that book, and, indeed, to be used alongside it rather than to be used independently as a stand-alone volume. Therefore, this book will be of most interest to those who have already read An Introduction To Using GIS In Marine Biology . This book consists of five exercises covering the practical use of GIS in marine biology using ERSI s ArcGIS(r) 10.2 GIS software and R statistical software. These exercises are based around integrating GIS and Species Distribution Modelling (SDM), and work through an example of an SDM from processing your survey data, through making raster data layers of environmental variables to constructing an SDM, visualising its predicted spatial distribution and validating its predictive ability. The exercises are designed to be followed in the order they are presented, and work with a specific data set, which can be downloaded separately for free. Working through these five exercises will help the novice GIS user obtain experience in creating and using SDMs, and so develop their GIS skills. Unlike most other GIS tutorials, this information is specifically presented in a marine biological context and all the exercises use real data from a marine biological study. Therefore, these exercises are more likely to provide the kind of experience in using GIS that marine biologists will find useful and applicable to their own research. These exercises are presented in the same easy-to-follow flow diagram-based format first introduced in the How To. section of An Introduction To Using GIS...
