Brand New Book ***** Print on Demand *****.Investing could be simple and profitable to beginners and experts alike. The best and easiest way is to use ETFs. Most fund managers and hedge fund managers after their hefty fees cannot beat the index. Just buy SPY (an ETF stimulating the market) and you re diversified and beat most fund managers. This book is different from most other books on this topic. There are many techniques hidden that help you to beat the market and at the same time ensure safety for your hard-earned money. The average of the loss of the last two market crashes is about 45 from their peaks. It is the main theme in this book and I allocate a good portion of this book to this theme. I also debunk the myth of you cannot time the market. There may be false signals but they correct themselves shortly. I use the simplest way to time the market without the hard-to-learn charting. Just follow the simple techniques. There is nothing else besides this low-priced book to buy or subscribe. This book describes the examples and my experiences of exiting the market to reduce your losses and reentering the market for the best profits. I made 80 in my largest taxable account in 2009. Selling stocks and buying stocks take a lot of time and emotions vs. trading ETFs. I also provide a simple way to evaluate ETFs using free information in the web. When the signal tells us to buy, you can profit by buying any ETF that simulates the market. ETF rotation could make you even more profit. It is described in this book.
